Certificate: **64-C-0221**  
Site: 001  
SHELBY & AMY RAINEY

Type: ROUTINE INSPECTION  
Date: 21-DEC-2016

### 3.56(b)(1)

#### SANITATION.

\*\* The wood surfaces of the rabbits primary enclosures had white spots in some areas, a greenish stain in another and some areas appeared darker than others where they had been soiled. These surfaces need to be cleaned and/or sanitized. If the surface is no longer able to be sanitized then it needs to be repaired and/or replaced to minimize disease. Primary enclosures for rabbits shall be sanitized at least once every 30 days by washing all soiled surfaces with a detergent solution followed by a safe and effective disinfectant. Correct by January 21, 2017

### 3.131(c) REPEAT

#### SANITATION.

\*\* There was clutter in several pens. There was a bottle and several strands of hay bale twine in the pasture with the cow. In the alpaca enclosure there was a pan on the ground, a couple of water hoses and several other miscellaneous items. These items should be removed from the animals primary enclosures to ensure their safety and prevent injury.

This inspection and exit interview were conducted with owner.
