Site: 001

Mister Crabs & Family Co.
Entertainment, Shows, and Hermit
Crab Supplies

Type: ROUTINE INSPECTION

Date: 01-APR-2025

3.78(d)

Outdoor housing facilities.

The entire back section of the perimeter fence is significantly shorter than the required height of 6 feet. An insufficient perimeter fence can allow unwanted animals or people to enter the facility and potentially harm the animals within. The perimeter fence must be constructed so that it protects nonhuman primates by restricting unauthorized humans, and animals the size of dogs, skunks, and raccoons from going through it or under it and having contact with the nonhuman primates. It must be of sufficient height (at least six feet high) to keep unwanted species out. It must be of sufficient distance (at least three feet) from the outside wall or fence of the primary enclosure to prevent physical contact between animals inside the enclosure and outside the perimeter fence.

To be corrected by April 23, 2025.

3.127(d)

Facilities, outdoor.

The entire back section of the perimeter fence is significantly shorter than the required height of 6 feet. Additionally, the chinchillas, sugar gliders, and prairie dogs do not have a perimeter fence enclosing them.

An insufficient perimeter fence cannot effectively act as secondary containment for the animals inside and can allow unwanted animals or people to enter the facility and potentially harm the animals within. The perimeter fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. It must be of sufficient height (at least six feet high) to keep animals and unauthorized persons out. It must be of sufficient distance (at least three feet) from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence.

To be corrected by April 23, 2025.

This inspection and exit interview were conducted with facility representatives.
