

Inspection Report

Tyler Cleckley
11706 Dorrance
Stafford, TX 77477

Customer ID: **41415**
Certificate: **74-B-0781**
Site: 001
TYLER CLECKLEY

Type: ROUTINE INSPECTION
Date: 04-DEC-2019

3.125(c)

FACILITIES, GENERAL.

The fridge in which cold animal feed is stored contained organic material and discoloration on the bottom and side walls indicating it had not been sanitized recently.

Fruit stored in open boxes beside the fridge appeared to be partially eaten and contained bite marks.

Feed not properly stored can become contaminated or spoil which can lead to illness or infestation. Ensure all feed is stored properly. Correct by 12/25/2019.

3.127(b)

FACILITIES, OUTDOOR.

No shelter was present in the outdoor enclosure containing one albino wallaby.

Animals must be offered shelter from the elements to protect them from injury, extreme weather, and predators. Correct by 20/20/2019.

3.131(d)

SANITATION.

An abundance of small flying insects were observed in the sugar glider areas in and around the animal feed. Brown crawling insects were observed in hedgehog enclosures and on the walls in the hedgehog building.

Without adequate pest prevention, infestation can occur which can contaminate food or bedding storage and spread disease. Additional pest prevention may be required in order to attempt to mitigate the amount of pests in the facility. Correct by 12/23/2019

This inspection and exit interview were conducted with site caretaker.
