Pigeon Forge, TN 37868

Customer ID: **3037**
Certificate: **63-C-0103**
Site: 001
BILL DELOZIER

Type: ROUTINE INSPECTION
Date: 06-JUN-2024

3.131(c)

Sanitation.

Several areas in the facility had an excessive accumulation of trash and debris. Old, dried-up produce was observed in the animal keeper areas outside the animal enclosures. Debris, such as bottles and paper, was observed in the fridge used to store produce fed to the animals.

Trash and debris can attract pests and negatively impact the health and well-being of animals. Premises must be kept clean and in good repair to protect the animals from injury and to facilitate prescribed husbandry practices.

To be corrected by: June 21, 2024.

3.131(d)

Sanitation.

Numerous live insects (too numerous to count) were observed in the animal keeper area adjacent to the enclosures housing two bears. Additionally, a trap for flying insects was covered in dead insects to such an extent that it was ineffective. There was a buildup of cobwebs on the upper part of the animal enclosures and ceilings.

Pests can harbor disease that negatively impacts the health and well-being of animals, as well as cause distress. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.

To be corrected by: June 21, 2024.

This inspection and exit interview were conducted with facility representative.
