Type: ROUTINE INSPECTION
Date: 12-JAN-2017

3.75(c)(3)

HOUSING FACILITIES, GENERAL.

** The ring-tail lemurs have a piece of furniture that is stained in a brown color. The owner stated that they power washed it but it is still stained. When hard surfaces that the animals come in contact with can no longer be cleaned and sanitized, then it shall be removed and/or replaced.

**In the common marmoset's enclosure the two perches had old dried feces staining the top of it. The feces should be removed daily and the perches shall be cleaned and sanitized.

Hard surfaces with which nonhuman primates come in contact must be spot-cleaned daily and sanitized in accordance with Sec. 3.84 of this subpart to prevent accumulation of excreta or disease hazards. If the species scent mark, the surfaces must be sanitized or replaced at regular intervals as determined by the attending veterinarian in accordance with generally accepted professional and husbandry practices. Floors made of dirt, absorbent bedding, sand, gravel, grass, or other similar material, and planted enclosures must be raked or spot-cleaned with sufficient frequency to ensure all animals the freedom to avoid contact with excreta. Contaminated material must be removed or replaced whenever raking and spot cleaning does not eliminate odors, diseases, insects, pests, or vermin infestation. All other surfaces of housing facilities must be cleaned and sanitized when necessary to satisfy generally accepted husbandry standards and practices. Sanitization may be done by any of the methods provided in Sec. 3.84(b)(3) of this subpart for primary enclosures. Correct by January 27, 2017.

This inspection and exit interview were conducted with the owner.
