Eleva, WI 54738

Customer ID: **16022**

Certificate: **35-C-0311**

Site: 001

SCHULTZS COUNTRY BARN L L C

Type: ROUTINE INSPECTION

Date: 25-MAY-2017

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The written Program of Veterinary Care is incomplete. The information for ectoparasites and internal parasites is missing information. In addition, the Attending Veterinarian has not visited the licensee's premise since 2015. An incomplete Program of Veterinary Care and the Attending Veterinarian not conducting regularly scheduled visits doesn't ensure that the animals are receiving optimal care. The Program of Veterinary Care must be filled out completely and the Attending Veterinarian must visit the site and inspect all regulated animals and facilities. Correct by 6/25/17.

3.125(a) REPEAT

FACILITIES, GENERAL.

The fence line surrounding two enclosures containing a total of six goats was mangled in areas with sharp points sticking inwards towards the goats. Sharp points can cause injury to the goats that come into contact with it. The fence line must be repaired or replaced to protect the animals from injury.

3.130

WATERING.

Watering receptacles for six of the goats and one pig was yellowish in color. The licensee informed me he has not changed out the water in two days. Unsanitary water can lead to the spread of disease. The watering receptacles needs to be changed out on a more regular basis prior to the water changing to a yellowish color. Correct immediately.

This inspection and exit interview were conducted with the licensee.

End of report.
