Animals for Education

Type: ROUTINE INSPECTION
Date: 20-MAR-2025

2.40(b)(2) Repeat

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

In the Infirmary used for exhibit animals, a pink medication box labelled for exhibit animals only, there was a container of Capstar that expired 07/2021. Medical supplies that are not properly labeled and/or not properly stored, could deteriorate, become contaminated, or be misused, possibly resulting in harm to the health and well-being of the animals. Medicines used to prevent or treat disease must be properly stored, labeled, and not expired in order for them to appropriately and effectively prevent, control, and/or treat diseases.

Correct by: 03/22/2025

3.131(c)

Sanitation.

The kitchen/food prep area was dirty and had a layer of dust and yellow slime in the section of the sink used to store clean dishes. The yellow slime was dried and hard. Additionally, the band saw used for food preparation had a thick yellow sludge on the blade and blade guide. These areas need to be cleaned to ensure that food and food receptacles cannot be contaminated during cleaning and/or preparation.

Correct by: 03/22/2025

3.158(a)(1) Repeat

Cleaning, sanitization, housekeeping, and pest control.

Two primary enclosures, housing a total of 2 birds, were dirty with a buildup of wet excrement and food waste. Insufficient cleaning can lead to disease hazards, insects, pest and odors. Excreta and food waste must be removed from within, under, and around the primary enclosure often enough to prevent excessive accumulation.

Correct by: 03/22/2025

This inspection and exit interview were conducted with Facility Representative.
