Type: ROUTINE INSPECTION
Date: 04-MAR-2015

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

There is no list or record of animals on hand. Each exhibitor shall make, keep, and maintain records which fully and correctly disclose the following information concerning animals purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of. The records shall include the name, address, phone number and other information as required. Correct by April 1, 2015.

3.125(a)

FACILITIES, GENERAL.

The roof of the large shelter in the center of the Patagonian cavy enclosure has caved in. There are boards with the sharp points of the nails exposed, and the structural strength of the shelter has been compromised. The Patagonian Cavy could become injured by the nails and loose boards. The shelter shall be repaired or replaced and all loose material shall be removed to protect the animals from injury. Correct by April 1, 2015.

The large barn in the camel enclosure is severely leaning and there are loose boards that could fall and injure the camels. The barn is not structurally sound. The barn shall be repaired or removed and replaced to protect the camels from injury. Correct by April 15, 2015.

The raccoon has dug a large hole or tunnel in the enclosure near the enclosure fence that may allow the raccoon to escape into the porcupine enclosure. There is no barrier to prevent the raccoon from digging out. A proper barrier shall be constructed or the raccoon should be moved to another enclosure that will securely contain the animal within. Correct by March 12, 2015

The side of the pig barn has boards that are broken and/or separated from the structure. The barn shall be repaired to protect the pigs from injury. Correct by April 15, 2015.

3.127(d)

FACILITIES, OUTDOOR.

Inspection Report

Upon entering the main gate there is no perimeter fence to the left, behind the enclosure housing the 2 baby goats and young muntjac. When the main perimeter fence on that side meets the enclosure it stops and then the enclosure fence continues until it meets at the front. A six foot perimeter fence is required for nondangerous exotic animals. The fence must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside of the perimeter fence. It should also serve as a secondary containment in the event of an animal escape. The perimeter fence shall be completed to protect the animals. Correct by April 30, 2015.

Inspection and exit briefing conducted with the owner,
