Type: ROUTINE INSPECTION  
Date: 17-APR-2024

---

### 3.153(b)

#### Primary enclosures.

The current primary enclosure housing five doves does not provide sufficient space to allow each bird to make normal postural and social adjustments, such as bathing, and flight. In addition, one dove is down on the bottom of the enclosure in a bowl nesting on eggs. With the limited space she cannot avoid getting feces from the other birds in the bowl or on her. These doves must be provided a larger enclosure that allows for adequate freedom of movement to avoid feces and additionally provides nesting space and materials for breeding birds.

Correct by: April 21, 2024

This inspection and exit interview were conducted with the licensee.
