TOWNSHIP OF MT LAUREL

Type: ROUTINE INSPECTION

Date: 02-APR-2015

3.125(a)

FACILITIES, GENERAL.

(a) Structural strength.

Chapman's back fence-

The wire mesh at the bottom of the split rail fence is curling into the pig enclosure. Sharp points are present that could potentially cause harm to the pig. Additionally, the vertical posts are rotted and leaning. These damaged areas leave the fence structurally unsound.

These damaged items must be repaired or replaced to prevent animal injury and to maintain the structural strength of the primary enclosure.

TO BE CORRECTED BY: APRIL 20, 2015

The exit briefing was conducted with the facility representative.
