

## Inspection Report

University Of Missouri-Columbia  
310 Jesse Hall  
Columbia, MO 65211

Customer ID: 1461

Certificate: 43-R-0048

Site: 001

UNIVERSITY OF MISSOURI-COLUMBIA

Type: ROUTINE INSPECTION

Date: 15-MAY-2017

### 2.33(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

\*\*\*An adult female pig (#10-1) had a horizontal crack on the lateral claw of the left rear hoof. The crack appeared deep and extended from the lateral edge across the top of the hoof. Although the pig would bear full weight on the limb with the affected foot, the animal was also observed occasionally toe-touching with the same limb. The animal care staff was not aware of the condition and, therefore, veterinary staff had not been alerted about the pig's hoof and no treatment plan had been initiated prior to the inspector pointing out the animal's condition. This condition can be painful. This animal was examined by a veterinarian and an appropriate treatment plan was developed during the inspection. The facility must ensure that the treatment plan is followed and that all animals receive adequate veterinary care at all times.

The inspection was conducted May 15-18, 2017 and an exit interview was conducted on May 18, 2017 with facility representatives.
