

Inspection Report

City Of Clay Center
Post Office Box 37
Clay Center, KS 67432

Customer ID: **4099**
Certificate: **48-C-0017**
Site: 001
City of Clay Center

Type: ROUTINE INSPECTION
Date: 02-SEP-2014

3.84(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

There are excessive numbers of flies on the fruit and in the enclosure of the macaques. Flies can carry disease, contaminate food, and are a nuisance to the animals. The licensee must maintain a safe and effective program for the control of insects and other pests. Corrected at time of the inspection.

3.125(a)

FACILITIES, GENERAL.

There is a twisted wire protruding out from the lip of the water receptacle in the goat enclosure. The wire is about 1 to 2 inches in length with the points extending forward. Sharp points can cause injury to the animals. The licensee must ensure that the facilities are maintained in good repair to protect the animals from injury. Corrected at the time of inspection.

3.130

WATERING.

There is green material collecting on the inside of the water receptacle in the goat enclosure. There were also mosquito larvae seen in the water of this receptacle. Water receptacles that are not clean and sanitary can lead to disease transmission as well as decreased water consumption. The licensee must keep all water receptacles clean and sanitary. To be corrected by 4 September 2014.

3.131(d)

SANITATION.

There are excessive numbers of flies on the food and in the enclosure of the ground hog. Flies can carry disease, contaminate food, and are a nuisance to the animals. The licensee must maintain a safe and effective program for the control of insects and other pests. Corrected at the time of inspection.

The inspection and exit interview were conducted with facility representatives.
