### 3.158(a)(1)

#### Cleaning, sanitization, housekeeping, and pest control.

- In the second trailer, at least 6 cages had an excessive accumulation of feathers, waste and debris. These cages were empty, but adjacent to occupied cages and could therefore serve as a potential source of contamination to the neighboring birds. Excreta and food waste must be removed from primary enclosures and from under and around primary enclosures as often as necessary to prevent excessive accumulation of feces and food waste. The licensee must clean the affected cages and must prevent future accumulations of waste and debris.
