Certificate: **84-R-0045**

Site: 001

COLORADO PARKS AND WILDLIFE

Type: ROUTINE INSPECTION

Date: 18-MAY-2016

### 2.30(c)(1)

#### REGISTRATION.

In October 2015 the IACUC approved a protocol where black footed ferrets are being used and housed at a nearby federal facility and has not notified the AC Regional Director of this additional site/location where regulated research is being conducted.

A research facility shall notify the AC Regional Director in Ft. Collins by certified mail of any change in the name, address, or other change in operations affecting its status as a research facility, within 10 days of such change.

Correct by May 29, 2016

### 2.31(c)(1)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

The IACUC only meets once a year (September 17, 2014 & September 16, 2015) to review the research facility's program for the humane care and use of animals. The IACUC does however conduct inspections of one of the research facility's animal facilities every 6 months. During this time some protocols may be reviewed, and there may be some review & discussions of the facility's program of humane care & use of animals among the inspectors during the facility inspection. These facilities inspections, however, are only performed by a subcommittee of 2 or 3 of the 15 IACUC members who eventually approve the subcommittee's facility inspection report. This does not constitute a quorum necessary to conduct a required 6 month meeting, nor does it completely review the facility's program for the care and use of animals.

The IACUC, as an agent of the research facility, shall review at least once every six months the research facility's program for the humane care and use of animals. An agenda shall be sent to all IACUC members prior to the meeting which would list the proposed activities that will be reviewed.

Correct by June 30, 2016

## Inspection Report

---

### **INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).**

One of the registrant's PI has a project with black footed ferrets (that was approved in October 2015) that is conducted at a nearby federal facility where these animals are studied and housed.

The IACUC has not made a site inspection of these animal facilities, including the animal study areas, during their February 2, 2016 inspection. The registrant does not receive any inspection reports from the IACUC (if there is one) at this federal facility to use as a basis for their evaluation.

The IACUC shall inspect, at least every 6 months, all of the research facility's animal facilities, including animal study areas, where research is being conducted irrespective of who operates, and cares for the animals that the facility (federal, private, state etc.) has. Alternatively, you may elect to accept the other facility's IACUC semiannual inspection as a basis for your evaluation if the IACUC approves this method and is comfortable with that IACUC's procedure of conducting inspections is complying with all applicable AWA regulations and standards.

Correct by June 30, 2016

### **3.127(d)**

#### **FACILITIES, OUTDOOR.**

The perimeter fence around the puma enclosure ranges from 7 feet to 7 feet 3 inches. A 8 foot perimeter fence is required for this species of animal.

The perimeter fence must be at least 8 feet high. Fences less than 8 feet high must be approved in writing by the AC Regional Director.

Correct by June 30, 2016

This inspection was performed with the Facility Veterinarian, Wildlife Technician, & the Program Assistant.

This inspection report will be E mailed to the Facility Veterinarian with a copy to the Program Assistant. The exit interview was conducted on-site with the 3 individuals listed above.
