Lambertville, MI 48144

Customer ID: **327841**

Certificate: **34-C-0371**

Site: 001

INDIAN CREEK INVESTMENT III,
LLC

Type: ROUTINE INSPECTION

Date: 04-OCT-2023

2.40(b)(3) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

*One cream female goat was observed holding up its right front leg. The goat was partially weight-bearing while walking. The facility identified the issue but failed to notify the attending veterinarian.

*The facility had two goats isolated for limping. The facility did not notify the attending veterinarian that the limping has persisted despite administration of pain medications.

Failure to contact the attending veterinarian and to convey unimproved animal conditions within a timely manner can delay diagnosis and treatment leading to unnecessary animal discomfort. Daily observations of all animals to assess their health and well-being must be conducted. Daily observations may be accomplished by someone other than the attending veterinarian provided that a mechanism of direct and frequent communication so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian.

To be corrected by COB 6-OCT-2023

2.131(c)(1)

Handling of animals.

An outdoor exhibit, housing one blue-and-yellow macaw and one green-winged macaw, did not have a complete barrier fence. The north side of the barrier fence was broken and down on the ground. An incomplete barrier fence during times of public exhibition can lead to animal or human injury. During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of the animals and the public.

To be corrected by COB 6-OCT-2023

3.153(a)(1)(i)

Primary enclosures.

An outdoor enclosure, housing four ostriches, was constructed using fixed knot fencing. The fence was approximately 10 feet tall. Near the waterer, there was approximately three feet of the full-length fencing protruding into the ostrich enclosure. There were multiple areas on this protruding portion of the fence where the metal wire strands were broken, creating sharp points. Sharp points can lead to animal injury. Primary enclosures must be constructed and maintained so
