ROOSTER COGBURN OSTRICH

Type: ROUTINE INSPECTION

Date: 03-OCT-2014

2.131(d)(2)

HANDLING OF ANIMALS.

***At the time of inspection, there was not an identifiable attendant present at all times when the public is allowed contact with the animals. The public is allowed access/contact with regulated animals such as fallow deer and goats on a self-guided tour of the facility's grounds. There was 1 attendant present in the ticket booth at the beginning of the inspection; however, the ticket booth faces away from the animal enclosures. This attendant is responsible for selling tickets and merchandise, filling food cups and periodically monitoring the animal area. The absence of an attendant, whose sole responsibility is to oversee public contact with the animals, in these areas endangers the health of the animals by potentially allowing activity (rough handling, improper feeding, etc.) that is harmful to the animals. The licensee must ensure during periods of public contact, a responsible, knowledgeable and readily identifiable attendant is present in these areas at all times.

Corrected at the time of inspection, as a second attendant arrived to oversee the animal areas.

3.130

WATERING.

***The enclosure housing 75 fallow deer and the enclosure housing 6 goats had dirty water receptacles. There was a buildup of green debris on the interior surface of the receptacles along with green debris floating on top of the water. Water receptacles must be maintained in a clean and sanitary condition in order to ensure that the animals are provided with clean, potable water, to minimize disease hazards and to ensure that they maintain adequate hydration. Water receptacles should be cleaned at a frequency that is adequate to maintain standard husbandry practices.

To be corrected by 10/10/14

Inspection and exit interview conducted with the owners.
