### 2.33(b)(5)

#### Attending veterinarian and adequate veterinary care.

A hog undergoing a procedure was pre-medicated with expired xylazine. The staff responsible for the administration of medications confirmed that the expired medications were used. The use of expired medications could lead to an inadequate level of sedation. The facility must ensure adequate pre-procedural care in accordance with current established veterinary medical procedures.

To be corrected by 12/24/2021

This inspection and exit interview were conducted with facility representatives.
