Type: ROUTINE INSPECTION
Date: 26-JUN-2023

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The female Bactrian camel was observed walking in an abnormal circular pattern for an extended period at the front of the enclosure near the guests. During her walk, she would repeatedly lift her head at the same place in her walk when she circled to the right. The facility noticed that she recently started walking in this circular pattern and attributed it to work around her enclosure and unwanted attention from the male. Although the facility is aware of the new abnormal behavior, they have not communicated it to their veterinarian in order to determine if there are any underlying causes or discussed a plan to mitigate the behavior. When sudden changes in behavior like this occur, it should be communicated in a timely manner to the veterinarian for guidance and a potential treatment plan.

Correct by: June 28, 2023

2.131(d)(2)

Handling of animals.

An employee was not present at the giraffe feeding station in the drive through park where guests were directed to park their cars if they wished to feed the giraffes. The inspector observed a car stop and instead of following park directions to place food outside the vehicle, the giraffe was observed reaching its head into the vehicle on the passenger side. This feeding situation creates a potential safety risk to the giraffe. The facility must have an employee present at all times to assure the guests are following the parks guidance, and feed the giraffe in an appropriate manner for their safety.

Correct by: June 27, 2023

3.125(a)

Facilities, general.

The metal for the shift door in the lynx holding area is broken, with a section of the metal track missing. This track needs to be replaced to keep the door in good repair and working condition for the safety of the animals when shifting occurs. This item was corrected prior to the end of inspection the 2nd day but the facility needs to have a process in place for identifying and correcting facility issues in a timely manner.

Correct by: June 30, 2023

This inspection and exit interview were conducted with the owner and general curator of the park.
