Customer ID: **12908**
Certificate: **43-B-3716**
Site: 001
CYNTHIA D DARLING

Type: ROUTINE INSPECTION
Date: 17-AUG-2015

3.84(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

(a) Cleaning of primary enclosures.

The enclosure housing 5 lemurs had a buildup of excreta on the ground of the outdoor portion of the enclosure. The excreta was dried and gray in color, indicating that it had been present for several days or weeks. The lemurs could not avoid the excreta when walking and sitting on the ground. There was also a swing in the enclosure that had old, dried excreta on it. This excreta had been mashed down from the lemurs walking on it. Excreta can be a disease hazard, can attract insects and other pests, and can cause odors. The licensee must remove the excreta and maintain an effective cleaning program.

TO BE CORRECTED BY AUGUST 24, 2015.

3.84(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

(c) Housekeeping for premises.

Two enclosures, housing a total of 6 lemurs, had excessively tall weeds and grass growing along the perimeter of the enclosures. Tall weeds and grasses provide hiding and breeding areas for pests such as insects, parasites, rodents, and snakes. Each enclosure also had pokeweed (*Phytolacca americana*) growing in it. This plant is toxic when eaten and can result in excessive salivation, stomach pain, and diarrhea. The licensee must trim or remove the tall weeds around the enclosures and establish an effective program of weed control. The licensee must also remove the pokeweed inside the enclosures.

TO BE CORRECTED BY AUGUST 24, 2015.

The inspection was conducted with a facility representative. The exit briefing was conducted with the licensee.
