ZACHERY KEELER
2516 WEST RAUCH Road
TEMPERANCE, MI 48182

Customer ID: **45064**
Certificate: **34-B-0225**
Site: 001
ZACHERY KEELER

Type: ROUTINE INSPECTION
Date: 11-JAN-2022

3.55 Direct

Watering.

The rabbit enclosure, housing one rabbit, did not have any drinking water. The water dish was dry and full of shavings. When the licensee offered the rabbit water, it drank excessively for approximately one minute. The lack of water can cause dehydration, distress, and even death. The licensee must ensure that potable water is provided as often as necessary for the health and comfort of the animals. This was corrected at the time of inspection.

3.58(a)

Classification and separation.

One rabbit was being housed with 2 capybara and 1 tortoise. To maintain their health, rabbits shall not be housed in the same primary enclosure with any other species of animals unless for scientific reasons. The licensee needs to provide the rabbit its own enclosure.

To be corrected by 1/19/2022

3.125(a)

Repeat

Facilities, general.

In the hedgehog house, there was an enclosure housing one hedgehog. On the top of the cage was an index card that stated, "unknown (found on floor)." A discussion with the employee revealed that when she arrived for work on December

Inspection Report

3rd, 2021, she found that hedgehog running loose in the building. The facility has begun the process of replacing the old hedgehog enclosures to a new design to prevent future escapes.

3.130 **Direct** **Repeat**

Watering.

One capybara enclosure, housing one capybara, did not have any drinking water. When the licensee offered the capybara water, it drank excessively for approximately 40 seconds. his was corrected at the time of inspection.

An outdoor enclosure, housing one hog, did not have drinkable water. The bowl of water that had been provided was completely frozen. When the licensee offered the hog water, it knocked over the bucket because it was too tall. The hog proceeded to drink the remnants of the water in the bucket for approximately 30 seconds. The lack of water can cause dehydration, distress, and even death. The licensee must ensure that potable water is provided as often as necessary for the health and comfort of the animals.

The water dish for 2 capybara was dry and full of shavings. Clean water receptacles are important for maintaining animal health and comfort. The licensee shall develop a method for ensuring water receptacles are kept clean and sanitary.

3.131(a) **Repeat**

Sanitation.

There was excessive fecal build-up in numerous enclosures including one kinkajou enclosure housing one kinkajou, and three sugar glider enclosures housing approximately 18 sugar gliders total. One of the sugar glider enclosures also contained an approximately 6-inch PVC pipe and a wooden rod, approximately 24 inch long x ½ inch diameter, that were excessively covered in fecal material. Proper cleaning of primary enclosures is crucial to minimize disease hazards, reduce odors, and prevent pests. The primary enclosures for these animals must be cleaned.

This inspection and exit interview were conducted with the licensee.
