Bridgeton, NJ 08302

Customer ID: **2053**
Certificate: **22-C-0007**
Site: 001
Cohanzick Zoo

Type: FOCUSED INSPECTION
Date: 15-JUN-2023

3.80(a)(1)

Primary enclosures.

On the exterior fence fabric of the gibbon enclosure there is a finer mesh material. The top portion of this mesh is secured however, the lower portion is detached and curling outward. This detached area should be secured to ensure that the enclosure is in good repair.

Primary enclosures must be designed and constructed of suitable materials so that they are structurally sound for the species of nonhuman primates contained in them. They must be kept in good repair.

TO BE CORRECTED BY: JULY 6, 2023

3.125(a)

Facilities, general.

THE FOLLOWING ITEMS ARE IN NEED OF REPAIR:

* The exterior base of the serval shelter has deteriorated wood. The corner of this same section has rotted and deteriorated wood thus leaving a hole in the shelter wall. This hole could allow the entrance of unwanted animals and/or vermin. This shelter should be repaired to ensure that the building is structurally sound and in good repair.

* The stockade gate, adjacent to the pig enclosure, is missing at least two pickets, thus leaving the gate in disrepair.

The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

TO BE CORRECTED BY: JULY 14, 2023

3.131(c)

Repeat

Sanitation.

Weeds are growing in the gutter above the tiger viewing window. Additionally, the leaf guard inside of this same gutter has become dislodged. Weeds and plants, as well as the dislodged leaf guard, can block the flow of excess water and affect

Inspection Report

the efficiency of the gutter to eliminate water.

Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart.

3.131(d) Repeat

Sanitation.

The black vultures were again observed on the primary fence of the Asiatic Bear as well as on the grounds of the primary enclosure. These birds present a health hazard with their droppings in and around the bear enclosure. According to staff, methods to remove the birds have been attempted but have not been very effective.

A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.

This inspection and exit briefing were conducted with the facility representative.
