Type: ROUTINE INSPECTION
Date: 13-FEB-2025

2.40(b)(2)

Repeat

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The licensee was administering an expired medication on their animals. During the inspection, a bottle of Pyrantel Pamoate was found with an expiration date of 08/04/2023. The licensee stated that they have been using this medication on some of the puppies and adult dogs. The use of expired drugs may have reduced effectiveness or cause harmful effects to the animals. The licensee must establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries. Correct by ensuring that all animals receive adequate veterinary care including the use of medications that have not expired.

3.13(c)(2)

Veterinary care for dogs.

The facility did not keep complete medical records for an animal for the required length of time. Records indicate that an Adult female Burnese Mountain Dog (#9255) was prescribed Carprofen and Cephalexin on 02/05/2024. The animal left the facility less than a year ago and the licensee states they did not keep the medical records for those treatments. Failure to maintain medical records for animals does not allow APHIS officials to determine adequacy of veterinary care. Correct by ensuring that the medical records for dogs are kept and maintained for at least 1 year after the dog is euthanized or disposed of and for any period in excess of 1 year as necessary to comply with any applicable Federal, State, or local law. Correct by 15-FEB-2025.

This inspection and exit interview were conducted with the licensee.
