CHRISTIE SHOWERMAN

Type: ROUTINE INSPECTION  
Date: 13-MAR-2019

### 3.81(c)(4)

#### ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

The facility does not have an enrichment program for its individually housed tamarin. NHP are very social animals and require enrichment to maintain their psychological well-being. Therefore, it is the facilities responsibility in conjunction with their AV to provide enhancement of the environment. When there are individually housed NHP that are unable to see and hear NHP of their own or a compatible species a program of enhancement must be established and maintained.

To be corrected by April 1, 2019.

### 3.125(a)

#### FACILITIES, GENERAL.

The facility's prairie dog has escaped its enclosure. The licensee admitted to not closing the door properly after chores. The prairie dog has dug a hole inside the kangaroo enclosure. Animals must be contained to prevent injury from other animals or escape from the facility. .The facility must be constructed to contain the animals and protect the animals from injury.

To be corrected by end of business today.

### 3.127(d)

#### FACILITIES, OUTDOOR.

The lynx and fox perimeter fence door had an approximately 6 inch gap at the bottom and was not 6 feet tall. Animals without a proper perimeter fence are potentially exposed to unauthorized persons and/or animals having contact with them. The perimeter fence also acts as a secondary containment to prevent escape from the facility which may lead to injury or death. All outdoor facilities housing non-dangerous animals must be enclosed by a perimeter fence that is at least 6 feet tall to be used as a secondary containment for the animals and prevent unauthorized persons from going through it or under it.

To be corrected by end of business today.

## Inspection Report

---

### 3.129(a)

#### FEEDING.

The facility has a lynx that is fed chicken leg quarter only. There are no supplements being fed. There are no outwardly signs of malnutrition of the lynx. The inspector is unable to palpate for body condition or determine bone density by visual inspection. It is commonplace to give exotic felines supplements when fed raw meat with bone as their primary diet. The food shall be wholesome, palatable, and free from contamination and of sufficient quantity and nutritive value to maintain all animals in good health. The lynx must be fed an appropriate diet to prevent disease and injury.

To be corrected by April 1, 2019.

This inspection and exit interview were conducted with the licensee.
