

## Inspection Report

Animal Visions Investment LLC  
PO Box 5097  
Sevierville, TN 37864

Customer ID: **500966**  
Certificate: **63-C-0287**  
Site: 001  
BRIARWOOD RANCH

Type: ROUTINE INSPECTION  
Date: 25-FEB-2025

### 2.40(b)(2) Critical

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

\*\*\*A young female zebra was observed with a small wound on her hind quarter in December 2024. The facility determined the wound was superficial and treated it but could not determine what caused the injury. In the afternoon on January 9, 2025 employees observed a mini zebu bull attacking the same zebra. They were able to separate them but the zebra had obtained extensive wounds. They immediately contacted the Attending Veterinarian who said he would come out that evening but he did not show. The next morning the zebra was found dead.

Although attempts were made to provide veterinary care for the injured zebra by the facility, adequate veterinary care was not provided prior to its death.

Appropriate veterinary care shall be provided to all animals in a timely manner. Correct from this date (February 28, 2025) forward.

### 2.40(b)(3) Direct

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

\*\*\*A female Aoudad was observed to be three legged lame, she was limping on her left forelimb. The attendant stated that he had noted one limping but was not sure if this was the same animal. Records show the veterinarian had made a visit to the park on January 27, 2025 visually observing all animals and treated some hoof stock for foot rot. The Program of Veterinary Care provides instructions for treating "stone bruising" but there is no information to show the animals condition had been observed and the information conveyed to the veterinarian.

Daily observation of all animals to assess their health and well-being may be accomplished by someone other than the attending veterinarian, provided that information is conveyed to the attending veterinarian in a timely manner.

Information concerning this animal shall be conveyed to the veterinarian and appropriate treatment provided.

Correct by March 2, 2025.

## Inspection Report

---

### 3.125(a)

#### Facilities, general.

\*\*\*The back fence at the goat enclosure on the hill in the walkthrough portion of the park is in disrepair. A new chain link fence has been built on the outside of the wooden fence to replace it but the wooden fence has not been removed and the boards are falling into the enclosure. The boards may contain nails or screws that could cause injury and the boards provide a trip hazard.

All fallen boards shall be removed to protect the goats from injury. Correct by March 7, 2025.

\*\*\*There is a divider fence constructed separating the goats and a donkey that is in disrepair. Due to recent rains the fence is leaning and does not appear to be secure. There are boards that have fallen off into the pen creating a trip hazard.

The fence shall be repaired or replaced to protect the animals from injury and maintain them securely within their enclosures. Correct by March 15, 2025.

\*\*\*The shelter in the camel enclosure has a tin panel wall that has been torn leaving sharp jagged edges that may cause injury to the camel when rubbing or scratching along the wall. All sharp material shall be repaired or replaced to protect the camel from injury. Correct by March 7, 2025.

This inspection and exit interview were conducted with the Manager.
