### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

In the whelping building of the kennel facility there is a three month old female Poodle, chip # 0802482720, which needs to be evaluated by the attending veterinarian. The animal had been sold and returned the previous week. The animal was observed with a matted left eye, a dull hair coat and it's movements were very slow. The dealer stated she had been treating the animal since it's return but it had not been evaluated by the attending veterinarian nor did the dealer have any treatment records. The animal must be evaluated by the attending veterinarian and the dealer must maintain written documentation of the evaluation and all treatment.

Affects one puppy.

Correct by July 23, 2015

### 3.1(c)(1)(2)

#### HOUSING FACILITIES, GENERAL.

The kennel facility consists of one indoor whelping building and a sheltered building. In the sheltered building there are both ground and raised wire enclosures with interior and exterior enclosure portions. The doorway inserts and or framing for thirty enclosures have rusted with worn and sharp edges and surfaces. These worn rusty doorway edges and surfaces need to be repaired or replaced to insure all materials can be readily cleaned and sanitized. Interior surfaces and any surfaces that come in contact with dogs must be free of excessive rust that prevents the required cleaning and sanitization, or that affects the structural strength of the surface; and be free of jagged edges or sharp points that might injure the animals.

Affects seventy-one adults.

Correct by September 22, 2015

The inspection and exit interview was conducted with the facility Representative and Sandra Meek, ACI.
