

## Inspection Report

Norma Dake  
1381 State Road Z  
Climax Springs, MO 65324

Customer ID: **34830**  
Certificate: **43-A-4978**  
Site: 001  
NORMA DAKE

Type: ROUTINE INSPECTION  
Date: 02-NOV-2016

### 3.1(b)

#### HOUSING FACILITIES, GENERAL.

\*\*\*Inside the sheltered building there was an accumulation of miscellaneous items collected at both ends of the aisleway, within empty enclosures and scattered on top of a counter. These items included an empty water bottle, gallon metal cans, a "Little Playmate" cooler and an overflowing trash can full of random items such as a light bulb, metal cans and faucet handle. Some of these items were covered with dirt and/or dust and some were located adjacent to animal enclosures occupied with adult dogs and/or puppies. This accumulation of items can increase the risk of disease and pest hazards. The licensee must ensure that all housing facilities are kept neat and free of clutter, any accumulation of trash, waste material, junk and other discarded materials in order to protect the health and well-being of the animals at all times. To be corrected by: November 16, 2016.

### 3.1(c)(3)

#### HOUSING FACILITIES, GENERAL.

\*\*\*Within a sheltered building and buildings containing outdoor shelter units, there was a build up of dirt/dust, debris and/or an excessive amount of cobwebs on the walls, flat surfaces and/or ceilings. The dirt and cobwebs were located along the walls inside of at least two enclosures housing adult dogs. Accumulations of dirt/dust, debris and/or cobwebs can lead to pests, odors and potential disease hazards. The licensee must ensure that all hard surfaces with which the dogs come in contact are spot-cleaned daily and sanitized in accordance with Sec. 3.11(b) of this subpart to prevent accumulation of excreta and reduce disease hazards. The licensee must also ensure that all other surfaces of housing facilities are cleaned and sanitized when necessary to satisfy generally accepted husbandry standards and practices. To be corrected by: November 16, 2016.

### 3.1(e)

#### HOUSING FACILITIES, GENERAL.

\*\*\*Within a short walkway for a building containing outdoor shelter units for enclosures housing adult dogs, there was a pile of straw strewn on the floor in the corner directly outside of the shelter units. There were cobwebs present over portions of the straw. This storage method of bedding creates an opportunity for pests and contamination. The licensee must ensure that all opened supplies of bedding are stored off of the floor and away from walls at all times. To be corrected by: November 7, 2016.
