Site: 001

ALBUQUERQUE BIOLOGICAL
PARK

Type: ROUTINE INSPECTION

Date: 13-SEP-2022

3.106(b)(3)

Water quality.

Water quality testing records indicate that daily water sampling for the pools in the enclosure housing two, adult male polar bears was not performed and/or documented. A review of all water quality record logs available at the time of inspection revealed 16 dates with no testing/results recorded: 03/07/22, 04/24/22, 04/28/22, 05/01/22, 05/12/22, 06/05/22, 06/22/22, 07/04/22, 07/08/22, 07/13/22, 07/24/22, 07/31/22, 08/07/22, 08/19/22, 08/21/22, 09/03/22.

Failure to perform daily water quality testing for pH and any chemical additives increases the risk that water quality will not be appropriate or safe for these animals that drink from, and spend a great amount of time in, these pools. Undetected water quality problems can result in animal health and behavioral issues. Water samples shall be taken and tested at least weekly for coliform count and at least daily for pH and any chemical additives. Furthermore, records must be kept documenting the time when all such samples were taken and the results of the sampling, and records of all such test results shall be maintained by management for a one-year period and must be made available for inspection purposes upon request.

TO BE CORRECTED BY 09/15/2022.

This inspection and exit interview were conducted with a facility representative.
