Type: ROUTINE INSPECTION  
Date: 20-JUL-2023

---

### 3.127(d)

#### Facilities, outdoor.

\*\*\*There is no perimeter fence surrounding the addition to the lemur house. The lemur houses have attached outside exercise pens that do not have a perimeter fence. There is a five foot barrier fence that runs along the public viewing side of the enclosure that prevents access to the lemurs but no perimeter fence surrounding the entire enclosure. A perimeter fence of six feet in height is required to restrict animals and unauthorized persons from going through it or under it and having contact with the lemurs. In addition, the fence will serve as a secondary containment system in the event that a lemur is able to escape its enclosure. Correct by August 21, 2023

This inspection and exit interview were conducted with the Licensee.
