Type: ROUTINE INSPECTION  
Date: 19-OCT-2016

### 3.125(a)

#### FACILITIES, GENERAL.

-The chain link fence of the primary enclosure cage 85, housing a lion named Jax, and two tigers named Gemme and Terra is approximately 12 feet in height straight up. There is nothing else at the top of this fencing. The current requirements for enclosure heights containing adult big cats are a fence height of 16 feet straight up, or a fence that is 12 feet high with a 3 foot kick-in at the top. The fence height for the current enclosure is inadequate to sufficiently contain the enclosed animals at all times. The licensee has started welding another enclosure area that is approximately 24 feet in height, which when complete would be of sufficient height to meet current requirements. The licensee must modify the current enclosure or move the large cats to enclosures that are constructed of such material that is appropriate for the animals, of such strength that is structurally sound, and are maintained in good repair to protect the animals from injury and securely contain the animals.

The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

This inspection and exit interview were conducted with facility representatives.

No regulated activity may be conducted at this site until it passes inspection with no non-compliant items.

#### Additional Inspectors

Tygart Michael, Supervisory Animal Care Specialist
