SIERRA NEVADA ZOOLOGICAL SOCIETY

Type: ROUTINE INSPECTION

Date: 26-MAY-2015

3.131(c)

SANITATION.

The foxtail grasses have not been cut around the back area of the lion enclosures (behind and outside of the primary enclosures and the exercise area) this season. The area is about 10-15 feet wide and 100-150 feet + long. The foxtails (about 12-18 inches high) are drying and if the seeds get into the pens, the seeds could penetrate the skin, nose, ears, eyes or other body parts. Also, the tall grass makes it hard to monitor rodent, other pest activity, and creates a fire hazard for the animals.

For the health and well-being of the animals, the facility should create a system to routinely monitor and correct these types of hazards in a timely manner.

To be corrected by June 15, 2015

An exit briefing was conducted with the facility representative
