

Inspection Report

Desiree Bogan
Lee Bogan
562 Tollett Road
New Hope, AR 71959

Customer ID: **27224**
Certificate: **71-A-0962**
Site: 001
LEE OR DESIREE BOGAN

Type: ROUTINE INSPECTION
Date: 23-APR-2014

3.3

SHELTERED HOUSING FACILITIES.

(b) Ventilation. ***** At time of inspection the whelping building had a high concentration of ammonia odor upon entering the building that caused eyes to water and burn. Additional ventilation needs to be employed in this building to aid in reducing this odor. This if not reduced can lead to health issues with the animals inside of this building such as the puppies which until weaned do not have access to the outdoors and fresh air.

TO BE CORRECTED: 6/23/14

3.9

FEEDING.

(b) ***** At time of inspection the self feeders throughout the kennel did not have lids on the portion of the feeder keeping the surplus feed in storage until it flows to the bottom of the feeder for consumption by the dogs. This allows for the potential of this food becoming contaminated from the fluids used in the day to day cleaning of the pens as well as allowing access to this feed to pests. Lids need to be put onto these self feeders to prevent contamination of the feed which can affect the health and well being of the animals in the kennel.

TO BE CORRECTED BY: 7/23/14

3.11 REPEAT

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

(c) ***** At time of inspection the whelping building has an accumulation of materials not used in the day to day husbandry of this building. This material allows for rodents, pests and snakes to find areas to live and reproduce which can lead to disease in the kennel. This material not needed in the daily husbandry of this building needs to be stored away from this building.
