**2.131(c)(1)**                      **Critical**                      **Repeat**

### Handling of animals.

During a paid public animal encounter session on March 1, 2025 a two-year old child who was sitting in her father's lap was bitten on the forearm by the 4-month-old female ring-tailed lemur "Lilly". As part of the encounter, the father of the child was feeding a food biscuit to the lemur. The child reached for the food biscuit in her father's hand at which time the lemur bit the child's forearm. During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient safeguards as to assure the safety of the animals and the public.

The facility instituted corrective action prior to this inspection on March 5, 2025. They no longer offer an animal encounter with a ring-tailed lemur and "Lilly" has been moved to a non-contact housing location.

This inspection and exit interview were conducted with a facility representative.
