Date: 09-SEP-2015

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The program of veterinary care is incomplete. There is no information on the type, dosage and route of administration of ivermectin. The licensee must have adequate guidance from the attending veterinarian on the use, dosage, frequency and administration of all medications and drugs. The program of veterinary care must be complete to provide guidance to the licensee to maintain the health of the guinea pig facility. The program of veterinary care must include the type of ivermectin, dosage, and route of administration so the animals receive the appropriate amount of parasite control. Correct by September 18, 2015.

3.25(c)

FACILITIES, GENERAL.

Storage. There are bags of shavings stacked on the floor along the east wall. Supplies of bedding must be stored in a manner that protects supplies against spoilage, infestation or contamination by vermin. The bags of shavings must be stored off the floor and away from walls to allow cleaning underneath and around supplies and to protect the bags from contamination and pests. Correct by September 25, 2015

An exit briefing was conducted with the owner.
