Environment enhancement to promote psychological well-being.

The current environmental enhancement program does not address Animal Welfare Act requirements for environmental enhancement to promote psychological well-being of birds. A multifaceted enhancement plan for birds is instrumental for their well-being as a means to address their needs to express species-typical behavior and promoting overall psychological well-being. The environmental enhancement plan as directed by the attending veterinarian and in accordance with currently accepted professional standards must be modified for birds to include plans for social grouping, environmental enrichment, and special considerations (i.e. housing nestlings, chicks or fledglings; birds showing signs of psychological distress through behavior or appearance; birds requiring restricted activity; and individually housed birds unable to see and hear birds of their own or compatible species).

Correct by July 17, 2024.

This inspection and exit interview were conducted with facility representatives.
