PATRICIA A. SHELLABARGER

Type: ROUTINE INSPECTION

Date: 01-MAY-2014

### 2.75(a)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

The Records of Animals on Hand form was not complete it did not have information regarding the source from which the animals was acquired (i.e born at the facility), complete address from where the animals had been acquired. Several of the dogs listed did not have the date of birth and date acquired. Proper record keeping is essential for tracking movement of animals utilized in regulated activities.

Keep and maintain complete records of information for all dogs.

To be corrected by: May 16, 2014

### 3.1(b)

#### HOUSING FACILITIES, GENERAL.

Inside the horse barn next to and around enclosure #12 (one adult Great Dane), #13 (one adult Great Dane) and no numbered enclosure (one adult Great Dane) is excess equipment, tackle, buckets, metal, trash barrels, tent and other items. Licensee stated that he also stores a tractor inside the building and has nowhere else to store these items. Excess equipment and other items inside the area where animals are housed can be a harboring ground for rodents and other pests which could potentially spread diseases to the animals.

Ensure that animal areas inside the facility are kept neat and free of clutter.

To be corrected by: June 2, 2014

### 3.4(b)(3)

#### OUTDOOR HOUSING FACILITIES.

On the west side next to the house outdoor enclosure #3 housing one French Bulldog the shelter has no wind/rain break at the entrance to the shelter. On the north east side next to the road outdoor enclosure # 16 housing 3 adult dogs has no wind/rain break at the entrance to the shelter. Dogs having inadequate protection from the wind, snow or rain could experience difficulty maintaining normal body temperatures.

## Inspection Report

---

Ensure all outdoor shelter structures have wind and rain breaks at all times for the health and well-being of the dogs.

To be corrected by: May 5, 2014

### 3.4(c)

#### OUTDOOR HOUSING FACILITIES.

Next to the house on the east side in the exercise yard housing one Adult Basset Hound the wood surfaces that are in contact with the dog is no longer impervious to moisture. This includes the door frame and stairs which no longer has paint leaving exposed wood. Unsealed wood surfaces can harbor bacteria and other disease pathogens that can be harmful to the dogs. The entrance to the plastic shelter in the exercise yard has an excess accumulation of mud and bedding caked to the surface which shows it has not been properly cleaned and sanitized.

Ensure that surfaces in contact with the animals in outdoor facilities are impervious to moisture and can be properly cleaned, sanitized or replaced.

To be corrected by: For the wood surface May 15, 2014 and the shelter cleaned May 5, 2014.

### 3.4

#### OUTDOOR HOUSING FACILITIES.

On the north east side near the road outdoor enclosure #16 housing 3 adult dogs has one medium plastic shelter that is not large enough to house all of the dogs. Outdoor facilities for dogs must include one or more shelter structures that are accessible to each animal in each outdoor facility, and that are large enough to allow each animal in the shelter structure to sit, stand, and lie in a normal manner, and to turn about freely so that they can be protected from the elements and alleviate undue stress from overcrowding.

Provide adequate amount of shelters for all animals inside the enclosure.

To be corrected by: May 5, 2014

## Inspection Report

---

### 3.10

#### **WATERING.**

On the west side next to the house the water receptacle in outdoor enclosure #2 housing two adult dogs has rough, chewed, deeply pitted edges which does not allow for proper cleaning and sanitizing.

On the west side next to the house the water receptacle in the outdoor enclosure housing one French Bulldog named "Butch" has rough, chewed deeply pitted edges which does not allow for proper cleaning and sanitizing.

On the west side next to the house the water receptacle in outdoor enclosure #3 housing one French Bulldog has green substance floating in the water indicating that this water receptacle had not been properly cleaned and sanitized. The water receptacle is also rough, chewed deeply pitted edges which does not allow it to be properly cleaned and sanitized.

On the north east side near the road the water receptacles in outdoor enclosure #16 and #15 is rough, chewed deeply pitted edges which does not allow for proper cleaning and sanitizing.

When the water receptacles are not properly cleaned and sanitized it can play a role in disease transmission.

Maintain all water receptacles so that they are kept clean and properly sanitized.

To be corrected by: May 4, 2014

### 3.11(a)

#### **CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.**

There is an excessive accumulation of feces in enclosure # 24 (three adult Beagles), enclosure #25 (three adult Jack Russell Terrier) on the other side of the road and the exercise pen next to the house on the east side (one adult Basset Hound). Licensee stated that these enclosures are cleaned on a rotating basis so it can be every third day. Excessive accumulation of feces may lead to an increase in diseases, odors, and pests.

Excreta must be removed from the primary enclosure on a daily basis.

To be corrected by: May 3, 2014
