Winchester, VA 22602

Customer ID: **2477**

Certificate: **52-C-0038**

Site: 001

WILSON'S WILD ANIMAL PARK

Type: ROUTINE INSPECTION

Date: 29-MAY-2014

3.125(a)

FACILITIES, GENERAL.

***From the parking lot of the facility, a goat was noticed sticking its head through the space between barb wires located above the perimeter/primary enclosure fence. It was determined that a climbing structure had been built against the inside of the fence. The height of the platform was such that a goat could extend its head over the fence and possibly escape from the enclosure. There is also a potential for injury from the barb wire. A primary enclosure should be constructed in a manner that prevents escape and injury. Modifications must be made to the fence or climbing structure to prevent an animal from extending its head over the perimeter / primary enclosure fence to contain the animals and prevent injury. Correct by May 31, 2014.

This is a focused inspection to evaluate veterinary care.
An exit briefing was conducted with the owner.

This is an electronic copy of the Microsoft Word inspection report dated 29 May 2014.
