Type: ROUTINE INSPECTION  
Date: 01-MAY-2017

**2.40(b)(2) DIRECT REPEAT**

### **ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).**

\*\*It was noted during today's inspection that "King" (microchip # #0006CEBC44) appeared to have lost more weight since the last inspection on April 28, 2017. The flank area appears more sunken in appearance, in addition to "King" being more depressed and listless. "King" was not interested when offered food nor was he willing to move when his name was called or prodded to move by the facility manager. Although "King" has been seen by the attending veterinarian, no diagnostic tests have been performed, however, Vetra Mega Probiotics and VetOne PancrePlus has been given which does not seem to be an effective treatment.

\*\*Continued lack of appropriate veterinary care leads to pain and suffering in animals. Attending veterinarian must reassess King's condition and the current treatment to determine if further measures need to be taken.
