Type: ROUTINE INSPECTION
Date: 21-MAR-2022

3.125(a)

Facilities, general.

The center one third of the front of the camel enclosure fence is compromised. The top section of fence is folded outward reducing the height of the fence by about 5 inches. Additionally, the associated electric wire has detached from the pole and is hanging low.

The structural strength of primary enclosure fencing must be maintained in good repair to ensure the integrity of the fence. The camel enclosure fence must repaired and made structurally sound to prevent escape or injury of the three camels. Correct by March 29, 2022.

This inspection and exit interview were conducted with the licensee.
