Site: 001
RONALD GIACINTO

Type: ROUTINE INSPECTION
Date: 09-NOV-2020

3.78(d)

Outdoor housing facilities.

Perimeter fence. A large tree has fallen over and destroyed a section (approximately 10 feet in length) of the perimeter fence and an empty enclosure near the ring-tailed lemur outdoor enclosure. The perimeter fence is required to keep unwanted species out such as dogs, skunks, and raccoons from going through it or under it and having contact with the non-human primates. Correct by removing the fallen tree and replacing the broken section the perimeter fence to protect the non-human primates from unwanted species when they are kept outdoors. Correct by December 9, 2020.

This inspection and exit interview were conducted with the facility representative.
