3.56(a)(1)

Sanitation.

Three rabbits housed together in one hutch had excessive amounts of feces accumulated inside a litter box and other areas of the hutch had feces and waste food build up. Excessive feces and food waste can lead to unsanitary conditions and contribute to ill health and disease in rabbits. Enclosures need to be kept reasonably free of feces and other debris by periodic cleaning and be sanitized every 30 days.

To be corrected by 5/20/2023.

This inspection and exit interview were conducted with facility representative.
