Certificate: **33-C-0382**
Site: 001

CRITTER CAMP EXOTIC PET SANCTUARY

Type: ROUTINE INSPECTION
Date: 17-JUN-2015

3.131(a) REPEAT

SANITATION.

The room containing the thirteen ferrets has excessive feces present along the floor trim boards. The ferrets are housed in enclosures inside of a facility room, but are allowed access into the room to play. Feces can harbor diseases that affect animals.

Thoroughly clean and sanitize the affected floor trim boards and repeat often enough to prevent build up.

3.131(d) REPEAT

SANITATION.

Additional provisions must be made to control the wild mouse population at the facility. Three mice were observed in different animal rooms during the time of inspection. Mouse feces and other evidence of the mice were also present in some of the animal rooms. The facility is currently using live traps in an attempt to control the mouse population, however, this method is not adequately controlling the population. Mice can carry disease that affect other animals.

Implement and maintain provisions that effectively control the wild mouse population to provide for the health and well-being of the animals.

Note: A thorough verbal exit briefing was conducted with the facility president on 6-17-15. The inspection report was sent by email on 6-19-15.
