

## Inspection Report

Town Of Windsor  
Po Box 508  
Windsor, NC 27983

Customer ID: **24062**  
Certificate: **55-C-0198**  
Site: 001  
TOWN OF WINDSOR

Type: ROUTINE INSPECTION  
Date: 05-AUG-2015

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\*\*Approximately 5 of the 15 Dorper sheep were noted to be lame but ambulating adequately. Several sheep were also noted to have misshapen and/or cracked hooves. Improper hoof care can lead to gait abnormalities, lameness and diseases.

\*\*\*The zebu was noted to have misshapen and mildly overgrown hooves, which has the potential to impact its ability to ambulate appropriately and can lead to lameness and disease issues. Inspectors noted that the zebu is moderately overweight. Park Supervisor and Town Administrator stated that the zebu has been professionally trimmed in past 6 months and are aware that ongoing trimming may be needed.

The Attending Veterinarian is aware of the lameness issues and is working regularly with the facility to correct the hoof issues throughout the facility. The addition of professional hoof care may needed to correct and stabilize the current hoof problems using appropriate methods to prevent, control, diagnose and treat diseases. Correction date: August 19, 2015.

### 3.125(a)

#### FACILITIES, GENERAL.

Four raccoons were sighted in the buffalo enclosure in and around the shelter. The inspectors noted that the raccoons were gaining access/departure by crawling under the enclosure fence behind the shelter. It is important that the facility be maintained in good repair to exclude unwanted animals from the buffalo enclosure, due to risk of disease and injury to buffalo. Repair or replace unwanted animals' access point. Correction date: August 12, 2015.

Exit interview conducted with Park Supervisor and Kate Campbell, ACI.
