### 2.126(b)

#### Access and inspection of records and property; submission of itineraries.

The current arrangement at the facility does not permit USDA Inspectors to safely inspect all sections of the spider monkey enclosure. The walkway to the back deck side of the enclosure is approximately 3 1/2 feet wide with the spider monkey enclosure wall to the left of the walkway made of chain link with holes large enough for the spider monkeys to reach through. There is a solid wooden wall to the right of the walkway which prevents the inspector from maintaining a safe distance from the enclosure. The spider monkeys have free access to all sections of the enclosure and it is necessary to walk down this walkway to fully inspect all sections. Provisions shall be made to allow the inspector safe access to all sections for inspection. Correct by November 21, 2022.

### 2.134(a)

#### Contingency planning.

The facility has not developed or written a contingency plan for emergencies. All exhibitors must develop, document, and follow an appropriate plan to provide for the humane handling, treatment, transportation, housing, and care of their animals in the event possible emergencies or disasters. A plan shall be developed in accordance with Section 2.134 of the federal animal welfare regulations. Correct by November 21, 2022.

This inspection and exit interview were conducted with a facility representative.
