Type: ROUTINE INSPECTION  
Date: 13-DEC-2021

---

**2.131(c)(1)**                      **Critical**                      **Repeat**

### Handling of animals.

On 9/28/2021, a guest was bitten by one of the kinkajous which caused a puncture wound on the tip of the finger. The guest had squeezed their finger under the kinkajou enclosure door. Security footage shows the guest and child down on the floor attempting this contact without being observed or stopped by employees. On 11/13/2021, a guest was bitten by Chip, an Asian Small Clawed otter, during an interaction session when the guest attempted to reach down and hand a toy to the otter rather than drop the toy from higher up as instructed by employee. The otter jumped to grab the toy and bit the thumb of the guest.

Animals must be exhibited in a manner and with sufficient barriers or distance between animals and the public to assure the safety of the animal and the public.

Structural reinforcement of the bottom of the kinkajou enclosure door was made prior to the inspection. Staff oversight of the otter interaction participants and enforcement of interaction rules and staff directions has been increased prior to the inspection.

This inspection and exit interview were conducted with facility representatives.
