Type: ROUTINE INSPECTION
Date: 19-JUL-2021

2.40(a)(1) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The attending veterinarian for this facility retired 1 1/2 years ago. There is no written program of veterinary care from a new attending veterinarian.

Each exhibitor shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the dealer or exhibitor.

A written program of veterinary care, and regularly scheduled visits from an attending veterinarian is required.

To be corrected by July 26, 2021.

2.40(b)(2) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The adult, male brown bear has a 4-5" diameter ulcerated, red, wound above its left eye. The area around the wound is very swollen. The wound started in October of 2020 as a very small lump, and grew to its current size. The licensee is treating the wound with blue coat. There has been no veterinarian at the facility to properly diagnose and recommend

Inspection Report

treatment for this bear.

The adult bobcat is obese, and has matted hair on the neck and back. The bobcat was noted at time of inspection to walk very slowly, and gently.

Each exhibitor shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries.

The attending veterinarian must diagnose and recommend treatment for all animals noted to have a disease or injuries to prevent prolonged suffering and pain of the animals held at the facility.

To be corrected by end of business July 20, 2021.

2.40(b)(3) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The licensee noted a small growth on the adult, male brown bear in October, 2020. The licensee did not contact a veterinarian for diagnosis and treatment plan. The growth grew larger and the licensees wife stated that the bear tore the the growth off with its paw. This created a 4-5" wound that the licensee has been treating with blue coat.

The adult bobcat is obese, and has matted hair on its neck and back. The bobcat also appears to walk gently as if in pain.

Each exhibitor shall establish and maintain programs of adequate veterinary care that include daily observations of all animals to assess their health and well-being. If these daily observations are accomplished by someone other than the attending veterinarian a method of direct and frequent communication is required so that timely and accurate information

on problems of animal health and well-being is conveyed to the attending veterinarian.

The attending veterinarian must be contacted when any problem of animal health and well-being is noticed. The veterinarian must be contacted to formulate a diagnosis, and recommend a treatment plan to prevent prolonged suffering and pain.

To be corrected by end of business July 20, 2021.

3.125(a)

Facilities, general.

The shelter for the black bear, and the brown bear is in disrepair. There are boards that have rotted away at the bottom, and one entire side has been torn down by the bears.

The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

Repair or replace the shelter used by the bears to prevent injury to the animals.

To be corrected by July 26, 2021.

3.127(b)

Facilities, outdoor.

Inspection Report

The two bears do not have appropriate shelter from the elements. The shelter provided has rot at the bottom and only has two sides.

Natural or artificial shelter appropriate to the local climatic conditions for the species concerned shall be provided for all animals kept outdoors to afford them protection and to prevent discomfort to such animals.

Repair or replace the shelter so that it provides effective shelter from the elements for the bears.

To be corrected by July 26, 2021.

3.131(a)

Sanitation.

The sheltered part of the enclosure for the lion has not been cleaned since last fall per the licensee. There are accumulations of feces, hair, and excess food waste with mold. The bobcat enclosure has excessive feces in the litter box and another area around the center post of the enclosure. These two enclosures have a very strong odor.

Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.

Enclosures for animals must be cleaned of excreta and food waste as often as necessary to minimize disease hazards and reduce odors.

To be corrected by end of business July 20, 2021.
