Environment enhancement to promote psychological well-being.

Although the facility provides enrichment to the birds, they do not have an environmental enhancement plan in place to promote the overall psychological well-being of birds at the facility. Exhibitors must develop, document, and follow a species-appropriate plan for environmental enhancement to promote the psychological well-being of birds that is within industry standards and approved by the attending veterinarian. This plan must include special considerations under 3.154 (c) for the African Gray parrot and the singly housed Turkey Vulture. This plan must be made available for future inspections.
