WILDLIFE WORLD ZOO INC.

Type: ROUTINE INSPECTION

Date: 17-OCT-2023

2.75(b)(1)

Records: Dealers and exhibitors.

The record of animals on hand provided by the exhibitor has multiple errors. The facility representative stated that no new birds were acquired by the facility since 21 August 2023. The errors include:

***reporting species no longer at the facility

Great Horned Owl
Harris' Hawk
Hawk-Headed Parrot
Red-Crested Bustard
Southern Lapwing
White-Bellied Bustard

***not reporting birds observed during inspection

Dubois's Seedeater
European Starling
Fischer's Lovebird
Glossy Ibis
Himalayan Monal
Lavender Waxbill
Lesser Flamingo
Long-Tailed Paradise-Whydah
Masked Lovebird
Mourning Dove
Orange Weaver
Pin-Tailed Whydah
Princess Parrot
Regent Parrot
Rose-Ringed Parakeet
Superb Parrot
Superb Starling

Mismatch of number of animals on the record of animals on hand includes over and under reporting the number of animals observed during inspection. Failure to accurately report the number and species of animals exhibited at the facility impedes USDA APHIS Animal Care's ability to assess animal welfare and work in concert with other agencies and regulatory authorities in times of emergencies or disease outbreaks. Every exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

Correct by 10 November 2023.

3.150(g)

Facilities, general.

A malfunctioning overhead misting system in the primary enclosure for 2 outdoor housed Military Macaws has caused excessive soaking of the dirt pad of the enclosure. Approximately 2/3rds of the ground is thoroughly wet and muddy and appears to have been soaked for some time given the brown dirt is now turning black and green. The metal fencing at the bottom of the enclosure in contact with the ground is also rusted. Excess water accumulating in primary enclosures

Inspection Report

without adequate drainage can aid in pest infestations, development of strong odors and present disease hazards. If drip or constant flow watering devices are used to provide water to animals, excess water must be rapidly drained out of the animal areas by gutters, pipes or other methods so that the animals have the option of remaining dry. Corrected at time of inspection.

Correct from this date forward of 27 October 2023.

3.152(b)

Facilities, outdoor

At time of inspection there were numerous outdoor housed birds in individual or shared primary enclosures with no or inadequate shelter available for the animals to seek refuge from inclement weather. Affected birds in shared primary enclosures either live with conspecifics only or part of a mixed species collection. Failure to provide shelter from adverse weather for outdoor housed birds may result in their discomfort, poor health or even death. Outdoor housing facilities must provide adequate shelter, appropriate to the species and physical conditions of the birds, for the local climatic conditions to protect the birds from any adverse weather conditions and to prevent their discomfort from direct sunlight, precipitation or wind. Shelters must be constructed to provide sufficient space to comfortably hold all of the birds at the same time without adverse intraspecific aggression or grouping of incompatible birds.

The inventory of affected birds includes:

- 30 American Flamingo
- 5 Bar-Headed Goose
- 1 Black Crowned-Crane
- 1 Black Swan
- 3 Black-Necked Swan
- 1 Black-Throated Magpie-Jay
- 5 Blue-and-Gold Macaw
- 1 Cape Thick-Knee
- 2 Demoiselle Crane
- 2 Domestic Chicken
- 1 Eurasian Eagle-Owl
- 1 Goffin's Cockatoo
- 6 Golden Pheasant
- 3 Gray Crowned-Crane
- 2 Greater Vasa Parrot
- 4 Green Peafowl
- 1 Green-Winged Macaw
- 1 Guinea Turaco
- 2 Hyacinth Macaw
- 4 King Vulture
- 1 Laughing Kookabura
- 17 Lesser Flamingo
- 1 Long-Billed Corella

Inspection Report

1 Major Mitchell's Cockatoo
1 Mealy Amazon
1 Moluccan Cockatoo
3 Nicobar Pigeon
1 Severe Macaw
4 Sulphur-Crested Cockatoo
7 Taveta Golden-Weaver
3 Turkey Vulture
1 Von Der Decken's Hornbill
1 Western Plain-tan Eater
2 White-Naped Crane
2 Yellow-Headed Amazon

Correct by 26 December 2023.

3.153(a)(1)(i)

Primary enclosures.

Sharp points were observed in multiple primary enclosures of outdoor housed birds including metal wire in a Moluccan Cockatoo enclosure and broken wooden perches having the appearance of a skewer in a Hyacinth Macaw enclosure. Sharp points or edges from broken or unmaintained materials in birds' enclosures can cause them bodily harm. Primary enclosures must be kept in good repair and maintained so that they do not have any sharp points or edges that could injure the birds. Corrected at time of inspection.

Correct from this date forward of 27 October 2023.

3.154

Environment enhancement to promote psychological well-being.

A developed and documented environment enhancement plan for birds was not available for review at time of inspection. Failure to create and follow an environment enhancement plan can lead to poor health and psychological welfare of birds. A species-appropriate plan for environment enhancement is required to be developed, documented and followed in order to promote the psychological well-being of birds.

Correct by 11 December 2023.

This inspection and exit interview were conducted with facility representatives.
