Type: ROUTINE INSPECTION

Date: 08-MAY-2023

2.31(d)(1)(ii)

Institutional Animal Care and Use Committee (IACUC).

IACUC approved Protocol #1965 did not provide a written narrative description of the methods and sources used to determine that alternatives were not available to a major operative procedure that may cause more than momentary pain or distress to the animals that is included in the protocol (tissue ablation).

Per this Section, whenever a proposal for animal use contains procedures that may cause more than momentary pain or distress to the animals, the IACUC shall determine that: (1) the principal investigator has considered alternatives to those procedures and (2) that the principal investigator has provided a written narrative description of the methods and sources used to determine that alternatives were not available. These requirements ensure that all procedures contained in the protocol minimize discomfort, distress, and pain to the animals. The IACUC needs to address this item. Correct by 5/31/23.

This inspection and exit briefing were conducted with facility representatives.
