ALBUQUERQUE BIOLOGICAL PARK

Type: FOCUSED INSPECTION

Date: 04-DEC-2018

3.101(a)

FACILITIES, GENERAL.

The animal haul-out areas in the outdoor marine mammal pool have multiple locations with crumbling/cracking concrete and deteriorating fiberglass. Pieces of broken concrete/fiberglass could potentially fall into the pool and be ingested by the animals or an animal's skin could be injured by the rough surfaces as they are pulling themselves up out of the pool. Repairs must be made to all of the deteriorating pool surfaces in order to maintain the structural strength of this facility and to prevent injury to the 3 Harbor seals housed in this enclosure. To be corrected by: February 1, 2019.

This inspection and exit briefing were conducted with facility representatives.
