Type: ROUTINE INSPECTION
Date: 16-OCT-2023

3.15(a)(9)

Primary enclosures used to transport live dogs and cats.

On October 16, 2023 a flight arrived at John F. Kennedy International Airport containing 28 dogs and 5 cats, originating from Qingdao, China (AWB #272-73471845). Thin clothes were present in a majority of the transport enclosures, presumably as absorbable litter. A female, 1-year-old, Yorkshire, "Max" (microchip # 900219001599544) had a thin, long cloth tangled around both her hindlimbs, restricting her movement. The cloth had to be cut, along with the hair tangled in. Litter used in transport primary enclosures must be of a suitable absorbent material that is safe for animals.

This inspection was conducted with animal facility representatives. The exit interview was conducted with an airline representative by phone.
